

RURAL DISCOVERY DAY

22nd May 2014

at the RNA Showgrounds

Thursday 22 May 2014 was **Rural Discovery Day** held at the **RNA Showgrounds, Brisbane.**

It is an educational, interactive event for Primary School students to celebrate and learn about Queensland's primary industries. 1,000 primary school students participated in this event and there were 39 industries / groups presenting.

An unfortunate reality is that many children, especially those who do not have opportunities to visit farms, are unaware of where our food and fibre comes from. So these activities are important educational days.

Students hearing about bees, beehives, honey, pollination and the importance of honey bees (through pollination) for our Food Security.

**"Every thrid mouthful of food we eat
requires pollination by honeybees"**
