

Rural Discovery Day - Thursday 23 May 2013

This day is organized by the RNA (Brisbane Royal Show) for middle Primary School students to see, learn and participate in where their food and fibre comes from.

This year saw 37 groups of presenters and 1400 students descend on the RNA grounds.

Some 200 students from eight class groups were enthralled by our volunteer beekeeping presenters who spoke about all things bees and of course pollination and food security.
